World Class Web Hosting Packages

If you are looking for **world class web hosting**, PNGconnect's services run on powerful Australian Servers for a faster and better browsing experience! We utilise a cluster of servers dedicated to specific tasks to achieve higher performance.

Web Hosting Features and Benefits

Multi Server Clustering for the Optimal Performance in Web Hosting
PNGconnect's web hosting services run on powerful Australian Servers for a faster and better browsing experience! We utilise a cluster of servers dedicated to specific tasks to achieve higher performance. A total of 7 or more servers (web hosting, database, mail, DNS, and control panel) are utilised to deliver our web hosting services for each account. This means that there is no contention among different services to fully utilise the server's capacity. It is one of the reasons why PNGconnect is the best choice for your web host in Papua New Guinea.

Ideal Hosting for PHP Web Sites
With a wide range of PHP modules and libraries, we are the ideal choice to host the popular open source PHP scripts such as WordPress blog, Joomla content management system, shopping carts, etc.

World Class hosting packages
Our **World Class Web Hosting** packages are ideal for hosting a single personal or business web site. These packages are great for simple static web sites as well as dynamic sites such as Joomla, WordPress, and e-Commerce.

Multi Domain Options
You may easily upgrade to a multi domain package at a later date, if you have more than one web site to host. This will result in cost savings and easier management.

Hosted Exchange Server

Many of our customers are considering a move to an offsite email solution. We've been providing Hosted Exchange for several years and nobody offers this service at a lower price.

Signing up with PNGconnect

Q: Does PNGconnect provide Internet services?
A: PNGconnect is NOT an Internet service provider. They provide domain and email hosting most appropriate for your needs.

Q: I want to sign up and redelegate my domain to PNGconnect but my ISP tells me that I won't be able to send and receive emails.
A: Not true! You will experience no interruptions in getting your emails as we will setup your email accounts exactly the same way as they are now. The only thing you change is your POP3 (incoming mail server) and SMTP (outgoing mail server) settings.

Q: Can you host domain names like www.yourdomain.com.pg?
A: We can host any country specific domain, such as pg, .com, .net, .org, .com.au, .uk, .us, .de, .ch, .cn, .cx, .it, .mx, .ph, .id, .sg, .sk, or any other valid top level domains.

PNGconnect can assist you with registration of standard (.com, .org , etc) and .pg domains. Other Country domain registration is normally done via your local country's registrar. For other countries, once registered, simply set your DNS details to our DNS servers.

Q: How is my account managed?
A: With PNGconnect you can have two options. Either PNGconnect manages your account or give you access to your own control panel from where you can manage each and every aspect of your account yourself. That includes FTP access, email account setup, database setup and much more! For your own control panel please select at least Standard Plan.

Q: Are the servers safe and secure?
A: The PNGconnect servers are located in a world class data centre in Sydney and are managed by professionals around the clock to the highest industry standards. Everything is backed up daily.

Q: How do I transfer my site from another host?
The procedure to transfer a live site from another host depends on the complexity of your site. There are several things that PNGconnect provide to make your transition easier. Please review the following steps to use as a guideline.

P.O. Box 7077
Boroko NCD 111
Papua New Guinea
www.pngconnect.com
support@pngconnect.com
T +675 7373 4033 | F +675 325 0349

1. Sign up for an account with PNGconnect.
2. Upload the content of your site to our FTP
3. PNGconnect will create any relevant database that your site may need
4. PNGconnect will create the email addresses required
5. Test your site using the Instant Alias that PNGconnect provides
6. Once everything is good, you may redelegate your domain to PNGconnect DNS servers

Transfer Help
If your site has a significant amount of data to be transferred, we may be able to help you perform direct server to server transfer from your old host. Please send an email with the information about your old account's login information and your new account name with us. We will perform FTP download from your old server using the information provided.

Transferring a com/org/gov.pg domain name
Request a copy of the "Domain Redelegation Form" from us or download the form from our website: www.pngconnect.com. Scroll to the bottom of the page and select from downloads.

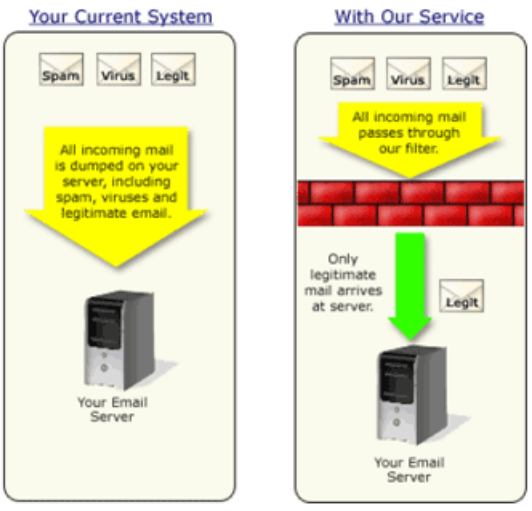
Complete and sign the form and fax it to PNGconnect on +675 325 0349 or email the form to accounts@pngconnect.com.

Email
During the DNS transition period, some of your emails may still go to your old host. You need to keep the account open and still check it using your old host's mail server's IP address or generic mail server name. The best way to do this is to set up a separate account on your email program:

1. Using the mail.domain.com - this will work for your PNGconnect account once it's transferred.
2. Using the old host's mail server's IP address or mail server name - this will continue to pick up mails that still go to the old host

Online anti-spam filtering

All incoming email first filters through our servers. We run a battery of tests on each message and quarantine any spam and/or viruses. We then pass along all legitimate email to your server. We can customize your filtering levels at any time.



The process is fully automated and only adds about 1 second to delivery time, even under very high volume.

To use our service it is necessary to change how your email gets delivered. Specifically, a modification is made to your company's MX record so that your incoming email first passes through our filters. This is not as big of a deal as it sounds. Privacy on our system is guaranteed. No one ever views or even has access to any individual email in this process. No copy or record of any email is retained on our servers, except for the quarantined junk mail and temporary emergency backup.

So give us a try...you've got nothing to lose but your spam.

PAPUA NEW GUINEA PREMIER DOMAIN HOSTING

Hosted Microsoft Exchange

K20 / month per user

Let us manage your mail. You run your business.

Many of our customers are considering a move to an offsite email solution. We've been providing Hosted Exchange for several years and nobody offers this service at a lower price. Let us help you connect all of your employees and all of their devices. Share contacts, calendars, tasks, and appointments, all with the safety and reliability of a managed Exchange solution from a company you already trust.

Shared calendar and contacts: Users can compare calendars to schedule meetings and have access to collaboration features like shared calendars, groups, global address lists, external contacts, tasks, etc.

Mobility: Includes ActiveSync. Sync your Smartphone to your Exchange account. Works with iPhones/iPads, Android, Windows Phones, Nokia and Blackberry devices.

Large mailboxes: 25 GB of mailbox storage standard and the ability to send attachments up to 50 MB (larger attachment sizes upon request).

Antivirus/anti-spam: Your current spam filtering service is included in this price, both inbound and outbound filtering.

Web-based access: Free Outlook Web Access. Access mail from anywhere with this premium browser-based experience that matches the look and feel of the full Outlook client.

Initial Fees: No setup fees, no contracts.

Guarantee: 30 day money back guarantee. 99.9% Uptime.

Lowest Pricing Available: K20 per month per user (Minimum three users please). No tiered pricing - Our low price includes all Exchange features. Nobody offers a package like this for such a low price.

Support - Enjoy the same great support that you're currently getting with Online Spam Solutions.

Migration: We'll walk you through the transition from your internal Exchange server or from your POP/IMAP service. We'll help you migrate your email, contacts, calendars, and other resources to our Hosted Exchange Platform.

Archiving: For an additional K15/mo./user get unlimited email storage with an unlimited retention period. Fully searchable archive.
